Costs and Charges

1. INTRODUCTION

Primus Global Ltd (the “FXPRIMUS” or “Company”) is a Cyprus Investment Firm (the “CIF”) incorporated in the Republic of Cyprus under the Department of the Registrar of Companies and Official Receiver, holding a Certificate of Incorporation with Number HE 337614.

FXPRIMUS is authorized and regulated by the Cyprus Securities and Exchange Commission (the “CySEC”) (www.cysec.gov.cy), with License Number 261/14 and the operations of the Company are governed by the Investment Services and Activities and Regulated Markets Law 87(I)2017, which transposes the Directive 2014/65/EU on Markets in Financial Instruments (“MiFID II”).

Primus Global Ltd is committed to transparency. This note provides clients with a high-level overview of how MiFID II is applied concerning the costs and charges associated with trading.

2. DEFINITIONS

Spread is the difference between the BID and the ASK price

Swap/Rollover is a rate charged on positions left open overnight. It is either positive or negative depending on the position direction and the swap charge that is either positive or negative.

Commissions: Commissions are charged on the Pro account type only, when opening a position and is automatically calculated according to the volume traded.

Inactivity fee: accounts with balance available and no trading activity over 90 days are charged a monthly fee. Activity involves trading, deposits, withdrawals.

3. COSTS AND CHARGES

3.1 SPREADS

The spread represents the difference between the Bid and Ask prices. This cost is incurred each time a client opens or closes a trade position (Entry and Exit Spread).

FXPrimus provides variable spreads that adjust dynamically based on current market conditions and volatility. During normal trading conditions, spreads typically remain tight. However, they may widen during market openings at 00:00 server time, at the close of the business day, during major important news announcements, and any even that can lead to volatile market conditions.

Example

You trade 1 lot of GBPUSD with current bid price at 1.37385 and ask price 1.37398. Therefore, you

sell at 1.37385(BID Price) and close at 1.37398 (ASK Price). The difference between 1.37385 and 1.37398 is the spread and in this case is 0.00013 points or 1.3 pips. Based on the volume of 1 lots the cost of spread is 0.00013 * 100,000 = 13 USD. The calculation is based on the lots traded time the contract size and the spread.

Since spreads are variable, their size may differ when opening and closing a trade. Our website offers information on the Typical Spread, and Current Spread for our trading platforms and all the Financial Instruments we offer. You can access these details through the following link: https://fxprimus.eu/live-quotes .

3.2 SWAP/ROLLOVER FEE

In forex trading, the swap charge or rollover interest refers to the net interest a trader gains or pays for holding a currency position overnight. This occurs because trading involves borrowing one currency to purchase another.

When a position is held beyond the daily rollover time (usually at 00:00 server time), interest is. For example, when trading EUR/USD, you're essentially borrowing US dollars to buy euros—incurring interest on the borrowed USD and earning interest on the euros held.

Triple swap is charged on Wednesday or Friday nights to cover position holding costs over the weekend. More info on the MT4 trading platform on which day an instrument has a triple charge.

Example

EUR/USD 1 lot short position | Swap long : -11.297 | Swap short : 4.491

Formula to calculate the swap fee:

(lots * long or short swap * point size* contract size) therefore

(1 * (-11.297) * 0.00001* 100,000) = -11.297$

(1* 4.491 * 0.00001 * 100,000) = 4.491$

It's important to note here that MT4 round up the cost into the second digit, therefore, the swap rates would be -11.30 and 4.49 respectively

3.3 COMMISSION FEE

The Primus Pro account charges a commission fee every time an account holder opens a position. The commission fee is automatically calculated according to the volume traded. Commissions are $10 per lot or currency equivalent and applies on forex currency pairs, Indices and Metals.

The Primus Classic account type is commission free.

Example

DJ either short/long Position Size: 0.10 lots

Formula to calculate commission charge:

lot size * Commission fee

0.10 * 10$ = 1$

4. DORMANT, INACTIVE AND ARCHIVING POLICY

4.1 The Company will be charging a quarterly dormancy Account administrative fee for all the Dormant Accounts listed in its systems. This fee will be effective at the end of the month in which a specific Account qualifies as Dormant. The fee will be equal to the lesser of USD30 (or the equivalent of USD30 for Accounts denominated in currencies other than the USD) and the remaining balance in the Clients' Account.

4.2 Accounts that remain Dormant for a period of more than six months may be closed down and their balance will be concentrated on a separate temporary control account. The Company reserves the right to unilaterally amend at its discretion the dormancy Account administrative fee for closed Accounts. To reactivate such Accounts, please contact our Back-Office directly at support@fxprimus.eu.

4.3 All remaining bonuses and promotion credits will be automatically removed from Dormant Accounts.
4.4 Dormant Accounts with zero balance will be archived after a period of 90 days.

4.5 The Company will be charging an initial fee of USD 30 (see table below for other currencies) at the end of a 3 month period, in which a specific Account qualifies as Inactive. On every subsequent month that the account remains inactive, there will be a fee of USD10 (see table below for other currencies).

Currency	Initial Fee	Subsequent Months Fee
USD	30	10
EUR	30	10
GBP	30	10
SGD	30	10
ZAR	510	170
PLN	208	36
HUF	9960	3320

4.6 All remaining bonuses and promotion credits will automatically remove from Inactive Accounts
4.7 Inactive Accounts with zero balance will be archived after a period of 180 days.

Important Note:

The total costs and charges for your trading account(s) are displayed in the account statements, which can be exported and received from the MT4 and Web trader Platforms.

Cumulative Cost Impact

In order to help clients understand the long-term effect of costs and charges on their investment returns, the Company provides a cumulative cost impact illustration. This shows the total estimated costs and their effect on returns over a given period, expressed both in monetary and percentage terms.
A simple example or detailed illustration for each product category can be found in the relevant Key Information Documents (KIDs) available at the following links:

- **Major Forex Pairs**
- **Minor Forex Pairs**
- **Exotic Forex Pairs**
- **Precious Metals**
- **Indices**
- **Technology Indices**
- **Industry Indices**

Clients are encouraged to review these KIDs to better understand how costs may impact their returns over time.

In addition to cost details available on the MT4 and Web Trader platforms, an annual statement of costs and charges summarizing the total fees, commissions, and other charges incurred over the year is available upon request by the client. This summary is presented in accordance with MiFID II requirements, in both monetary and percentage terms, and includes the cumulative effect of these costs on the client's investment returns.

You can email **support@fxprimus.eu** to request a comprehensive breakdown of the costs and charges for your trading account(s).

5. POLICY REVIEW

This Policy is reviewed annually, or sooner if required, to ensure it remains accurate, effective, and compliant with applicable regulations.
